

Amanda Lwanga
Founder & Creative Director at Linger Design Studio

Amanda Lwanga is a licensed Professional Engineer, with over 13 years of experience in design and project management. She works closely with trusted developers, builders, general contractors, and artisans who are exceptional in their respective fields.

Her education and career are rooted in the sciences. In 2007 Amanda completed a Bachelor's of Applied Science in Environmental Systems Engineering and then in 2016, a Masters of Advanced Studies in Architecture – focusing on regenerative design.

In 2018 she left her career as a Senior Project Manager to operate her design firm, Linger Design Studio, full time. Linger Design Studio is recognized for their distinctive modern, vintage, and brutalist aesthetic. Today, Amanda is currently serving homeowners and businesses across Canada who are seeking to reduce their impact on the environment while basking in an elevated space.

As a strong believer in inter-disciplinary problem solving, Amanda believes that art, science, and design are all governed by similar principles.

Amanda's design practice is a culmination of her life experiences. It's rooted in her respect of the environment, methodic approach to problem solving, and her love of fine arts.
